

## **SELLER ENVIRONMENT, SAFETY, AND HEALTH PERFORMANCE (JULY 2007)**

Notice to Proposers/Bidders/Offerors:

It is the policy of BWXT Y-12 to award subcontracts only to firms that have demonstrated safety performance equal to or better than the industry average. In order to be considered for award, offerors must have performance as follows:

- A three-year average interstate Experience Modification Rate (EMR) not to exceed one (1). If requested, the proposer/bidder/offeror must submit this EMR on the letterhead of its Workers Compensation Insurance carrier.

When the EMR average exceeds one, BWXT Y-12 Safety Department may waive this requirement based on a specific review of the work package, documentation and proposed compensatory measures.

- Offerors are to submit Occupational Safety and Health Act (OSHA) form 300-A for the past three calendar years.

The offeror must submit this information on the Seller Safety Qualification Questionnaire with their proposal/bid. This Questionnaire is available on the "Procurement" link at <http://www.y12.doe.gov>.

Offers received from firms that do not meet these minimum requirements must be approved by the Safety Department to be considered.

**NOTE** The threshold statistical data are based on pre-determined industry classification codes, which have been assigned to certain BWXT Y-12 subcontracted services. The values were derived from the most recent North American Industry Classification System.
